

TAYLOR

Agricultural Fertilizers · Chemical Fertilizers

Pack size: 2.5 kg · Form: GR

Target: flower

EC Fertilizer

Type: NPK (Mg, S) 10 : 5 : 10 (5 : 27) with boron (B), copper (Cu), manganese (Mn), molybdenum (Mo), zinc (Zn)

TAYLOR is a high-quality multi-ingredient granular fertilizer with appropriately selected proportions of nutrients and low content of chlorides, intended for comprehensive fertilization of all rose species. The professional composition of macro- and micronutrients makes this fertilizer perfect for feeding other flowering plants, such as: tulips, dahlias, gladioli, narcissi, geraniums, surfin, petunias, carnations, asters, pansies, fuchsias, leukonias and others flower plants.

Macronutrients:

- nitrogen (N): 10%
- phosphorus (P₂O₅): 5%
- potassium (K₂O): 10%
- magnesium (MgO): 5%
- sulfur (SO₃): 27%
- boron
- copper
- iron
- manganese
