

VITAMIN B1 500

Veterinary Medicines · Injection Medications

Pack size: 50 ml · Form: injection

Target: cattle, horses, goats, dogs, sheep

Vitamin B1 Injection 50%.

Composition

Each ml contains:

- Vitamin B1: 500 mg
- Excipients (ad): 1 ml

Indications: This medication is used to treat or prevent a lack of thiamine (deficiency) when the form taken by mouth cannot be used or would not work as well as the injection. Thiamine is a B vitamin that helps your body to use carbohydrates for energy.

Administration and Dosage:

- Dogs: 1 to 10 mg.
- Cats: 0.5 to 5 mg.
- Horses, Cattle: 100 mg per 100 kg of body weight.

Administer intramuscularly, once daily or as recommended by the veterinarian.

Withdrawal Period: Meat: Nil.
