

Spinomax XRT

Environmental Health · Pesticides

Pack size: 20 kg · Form: baits

Target: mosquito

Specialized organic product for combating mosquito larvae in the form of tablets.

Active Ingredients

- Spinosad 6.25%
- Inert Ingredients: 93.75%

Pesticide Properties:

A specialized organic product for combating mosquito larvae containing the active substance Spinosad in the form of large tablets. Acts through contact and ingestion, affecting nerve receptors by binding to acetylcholine receptors, halting their activity, resulting in excessive stimulation of the nervous system.

Application Methods and Rates:

- Used to combat mosquito larvae in breeding grounds such as pools and marshes.
- Utilized at a rate of one tablet per 10 square meters of water surface.
- Product effectiveness lasts for 180 days after application.
